
2023 Fisheries Analyst Position

Northern Economics, an Alaska-based applied economics consulting firm with clients in energy, transportation, fisheries, resource management, and community and infrastructure development, has an opening for a talented individual on our team to primarily support our fisheries portfolio. At present this is a 100% remote position that does not require relocation to Alaska.

Position Description

Preferred and Required qualifications:

- Master's degree in an appropriate discipline; or Bachelor's degree in an appropriate discipline with minimum two years of consulting experience; or equivalent experience (Required)
- Demonstration of strong analytical, writing, speaking, and computer skills (Required)
- Two years applied research and writing experience (via Master's program or work experience) (Required)
- Interest and experience in fisheries science, management, or economics (Required)
- Demonstrated ability to work in team environment and meet deadlines (Preferred)
- Knowledge of Alaska issues (Preferred)
- Experience with managing small projects (Preferred)

Responsibilities include:

- Conducting research and analysis to support project needs
- Inputting, organizing, and analyzing information using analytical and statistical software
- Assisting more experienced staff with benefit/cost analyses, feasibility studies, economic impact assessments, environmental impact statements, etc.
- Writing reports related to economic and financial analysis and such other duties as assigned
- Working with team members to complete projects on time and on budget

Salary and Benefits

\$70,000-\$85,000. Northern Economics offers a competitive salary and benefits package, including 401(k), medical and dental insurance, and vacation and sick leave time.

How to Apply

If you wish to apply for the position please submit a cover letter, resume, and short writing sample in PDF format to job2023@norecon.com. We will be accepting applications primarily through June 24, 2023, but the recruitment period will remain open until we have recruited a suitable candidate.

About Northern Economics

Our mission is to help society make better decisions through the analysis we provide. Over the last 20 years our firm has developed more than 100 reports and analyses directly related to the assessment of fishery management and fishery and coastal resource issues. We offer a stimulating and collegial work environment emphasizing professional growth and client service while valuing objectivity, dedication, a sense of humor, integrity, and creative problem solving.
